Founded in 1976, Autodesk is headquartered in San Rafael, California. Autodesk was incorporated in May 1979 and its first product was the VectorWorks family of software tools. VectorWorks was one of the first digital-based drafting software products and it evolved into the first widely used (in 1982) desktop CAD software. VectorWorks was officially released in December 1979 and was used in a wide variety of engineering, architectural and manufacturing projects. In 1982, Autodesk released a series of six software applications for use on desktop computers. The first release was AutoCAD, a complete 2D drafting package. The latest release is Autodesk 3ds Max. Autodesk Autodesk was founded in 1976 by a group of Stanford University graduates who had developed a new computer-aided design and drafting software. The software, VectorWorks, was sold to Cor/Tenne Corporation and was renamed Autodesk. In 1982, Autodesk released AutoCAD, a 2D computer-aided design program which initially ran on a Macintosh II computer. Shortly after the release, Autodesk, in partnership with Datamedia, published the first version of Project Guide, a technical manual. The software tools were not just a product for industry; they were designed for academic institutions. The product was very successful and several software companies followed suit. In addition to the technical guidance, the manuals were useful in helping students understand the differences in CAD programs. The company was later purchased by Micrografx and then by Core

History AutoCAD was developed by Autodesk from 1985 to 2001. The first release, AutoCAD Version 1, was in August 1985. In 1996, the company began the use of the Open Document Format (ODF), to be able to store and transfer the files easily. Initially this was a proprietary extension of Microsoft Word, then a proprietary extension of Adobe Acrobat, but eventually became part of Microsoft Office. The Open XML format was released in January 2013 by Microsoft, allowing these documents to be freely converted to and from ODF without any problems. Was his process of being brought up to the abbacy recorded somewhere? I was wondering how Abbot Hubert was "dealt with" upon his return.
