## CafePilot Server Download

CafePilot Server is a Windows-based server software package that can be installed on an internal network PC to manage Internet cafe network. It will automate most administrative tasks and generate reports for all Internet cafes. CafePilot Server supports incoming connections from any number of connected Internet cafes. The following key features are included in CafePilot Server: Simple to use interface It is easy for Internet cafe manager to get acquainted with the system in just a few minutes. Check the balance of each customer, refill their tickets, approve credit card charge requests etc. Customizable accounts and ticket rates based on the Internet cafe location, time zone etc. A comprehensive report generator that will generate reports for any customer's activity. The reports are easily available and can be printed out or emailed to CafePilot clients. Uploading images to accounts, and managing images in the accounts with a gallery. Send automated payments to the client's cards and generate reports for each payment. Print tickets and tickets with barcodes for ease of management. Connect the Internet cafe network using DHCP or manually assign IP addresses. Automatically re-route the existing Internet cafe network traffic using the CafePilot DNS or redirect a customer's browser to CafePilot website. Customizable reports Support various versions of Internet Explorer, Firefox, Opera and Chrome. Export reports to various formats including HTML, TXT, XML and PDF. Supports multilingual interfaces for multiple markets. Comprehensive documentation The operation manual and detailed help are written in Japanese. Cafepilot Client Description: The CafePilot Client is a cross-platform client/server software suite that turns managing an Internet cafe into a child's-play activity. CafePilot Client supports connections over the Internet so Internet cafe businesses with multiple branches can use a centralized server. This will allow customers to roam between branches with generated pre-paid tickets. Here are some key features of "CafePilot": Cross-platform SQL database, no OLE MS Jet Engine problems Comprehensive log page Easily export accounts to a comma delimited flat file for easy integration with other systems Choice of creating Barcode tickets that allow customer to scan instead of typing login information CafePilot closes all specified application (including browser) windows when customer logs out Prepaid billing with customizable tickets e.g. add company name and logo Barcode tickets. Create and print accounts in bulk. Create accounts

## CafePilot Server Crack+

CafePilot is software suite that was designed to turn managing an Internet cafe into a child's-play activity. It is cross-platform, SQL database based software suite that allows any Internet cafe business to create and maintain accounts and billing, allows customer to log in with their pre-paid cards, allows to use any workstation as Guest account and manages the workstations and customer accounts very efficiently. Cafepilot software has been tested on Microsoft Windows and Microsoft Windows Server 2003, and Microsoft Windows XP Professional and Microsoft Windows Server 2003. General Information: Cafepilot is a cross-platform client/server software suite that turns managing an Internet cafe into a child's-play activity. It supports connections over the Internet so Internet cafe businesses with multiple branches can use a centralized server. This will allow customers to roam between branches with generated pre-paid tickets. Cafepilot is a SQL database based software suite that allows any Internet cafe business to create and maintain accounts and billing, allows customer to log in with their pre-paid cards, allows to use any workstation as Guest account and manages the workstations and customer accounts very efficiently. Cafepilot software has been tested on Microsoft Windows and Microsoft Windows Server 2003, and Microsoft Windows XP Professional and Microsoft Windows Server 2003. This project is for Windows XP and Windows Server 2003 environments only. Features: Cross-platform SQL database, no OLE MS Jet Engine problems Comprehensive log page Easily export accounts to a comma delimited flat file for easy integration with other systems Choice of creating Barcode tickets that allow customer to scan instead of typing login information CafePilot closes all specified application (including browser) windows when customer logs out Prepaid billing with customizable tickets e.g. add company name and logo Barcode tickets. Create and print accounts in bulk. Create accounts with custom username and password Expiring accounts, based on a calendar date or specific duration after first logon Limit ticket validity to particular time periods based on group Customizable low time warning Per-second billing Re-usable tickets Create different account types and set different rates for each e.g. "night-time" tickets, "2Hr" tickets etc Easily edit accounts. Change credit, expiration and delete accounts  Security Definable range of allowed IP addresses on the server so no foreign CafePilot client connects to your server. Customizable staff 1d6a3396d6
