I want to restrict the webservice to only 1 user/connection. I have used a password as security mechanism. i.e. the password entered by the user should match with the hardcoded password. I have a X509Certificate[] and I need to compare the the user entered password with the hardcoded password. Is this a good way to do it. Any suggestions will be of great help. A: The right way to do this is to use a cryptographic one-way hash function to uniquely identify the user. The hash of the password cannot be used to authenticate the user without access to the private key used to generate the public and private keypair. There are a variety of cryptographic hash

I just want to install a program with a setup file (setup. exe file) and it is so simple to open it with 7zip and extract the files I want to install. Can you help me? A: The setup files of Winrar archives usually contain a README file. Open it with notepad. If you opened a zip archive with WinRAR, you can find it on the root of the archive. It's normally named "CONTROL. ARCHIVE_INFO_WINRAR_INFO". Baath Party (disambiguation) The Iraqi Baath Party () was a political party in Iraq.
