I am facing the same problem as well. But the question is... did you pay the full price for the miracle box or did you buy it second hand? If you buy it second hand, there would be no cracking. Hope that helps. With the new release of the miracle box, the user experience is completely different than before. The app that allows you to download media to your microSD card is disabled in the new miracle box. Also, the updated miracle box supports up to 16GB MicroSD card. With the new miracle box update, there are a few bugs, however, the status of these bugs is not known at this time. As I understand it, the new miracle box is more or less a complete overhaul of the original miracle box software. And as you might know, the miracle box can't be opened manually. You may never know this unless you try. I suggest that you first try to activate the miracle box by using the jb 4.0.3. I just tried to do the same trick and the miracle box said : Failed to recover user data. Please please try to press the power button more than the original miracle box (40 seconds after starting). Please help me. Ebay for this. @ \$43.91 ( It is worth \$55.00 at going rate ) ( 16GB MicroSD Card \$18.99 ) this is not a scam. I got it a few days ago. The box is in perfect condition and everything works as usual.
