I'm beginning to think that it's true, but I'm also starting to wonder if that's a bit like the opposite of right-hand rule for fractions. Throughout history there has been a persistent misconception about the difference between a coincidence and a statistical anomaly. To be fair, this isn't the first time we've seen this misconception arise. Think back to the 1950s when the rocket scientists at the Jet Propulsion Laboratory (JPL) were trying to figure out why a rocket they were working on was
