This article is a brief overview of the features in AutoCAD Torrent Download 2015. It also shows how to create an action key combination and use it to make AutoCAD do something useful, such as save a drawing or a project. In the next section, "Exercise 1", you will use a series of action key combinations to run and save a drawing. Contents: Starting a New AutoCAD Project Creating a New Drawing Moving, Rotating, and Sizing Objects Adding a New Drawing Element Adding Annotation Creating a Template AutoCAD 2015 Starting a New AutoCAD Project To start a new project in AutoCAD 2015, open the New Project dialog box. In the Workspace list at the left, the name of the current project appears. In the middle, there are four tabs to create a new drawing, a project, an editing session, or a drawing template.

Selecting New Drawing opens the main New Drawing dialog box, where you can select the type of drawing, and add layers. Select the button that says New Project to display the New Project dialog box. Use these steps to open the New Project dialog box and create a new project in AutoCAD: Open the New Project dialog box by clicking New Project. In the center of the dialog box, select one of the following options: Project: Create a new project. Editing Session: Create an editing session. Drawing Template: Create a new drawing template. Select a button to change the project type. Name the project. Use the Create button to add the layers to the drawing. Note: The number of layers in a drawing is limited. In the example project, shown in the Figure on the left, a maximum of 15 layers can be added. To create a drawing template that is saved to a template file, select the Create Template button. This option opens the New Drawing Template dialog box, where

you can name the new drawing template and choose the style. If you select a drawing style, the drawing template is created automatically. To customize the style, select the Customize button. In the dialog box, select the style style you want to use, and click OK. You can then delete the template file and use it in a new project. You can rename the project by selecting the project name, and entering
