IISKeeper Crack

Официальный сайт: Тестируемое веб-сайтом: Сервис: Патеги: Комплект установочных программ: Price: Price on site: $39.95 Type of license: I.S. system requirements Web server: Not required J.S. system requirements Windows 2000/NT PHP Python IISKeeper offers a few ways for auto-renewal of subscriptions: - periodical payments(auto-renewal: monthly, yearly, or annual), - payments in advance for a given period, - payments in advance for a given number of daily or weekly payments The end-user of the software will get an 8% discount if he pays in advance. The "Unlimited sublicenses" option means that for a given time, the user can have as many active subscriptions as he needs without any renewal. If he misses the renewal time, the license will remain active for further invoices. IISKeeper is not only a software to encrypt IIS data, but an advanced tool for managing Web sites, restricting access to resources and provide users with a secure log-in/log-off process. IISKeeper Features - Auto payment - Log-off the user by his browser - Flexible "Auto renew" - User registration system - User's log-in history - Auto-renewal at the end of the period - List of error messages - Simple and convenient way to manage the passwords - Password hashing (RFC 2898) Testimonial: Bx

IISKeeper Crack [Latest]

--- With IISKeeper you will easily protect any resources of your site with a password. A protected resource is a folder containing subfolders and files or a single file. You don't have to create Windows user accounts. The list of users who have access to protected resources does not depend on the list of system users. For the Cookie authorization mode, the distribution package includes templates of input forms where the user enters a username and password. You can easily embed the form into your site. To protect your site, you'll just need five minutes for installing and configuring IISKeeper. Installation: --- After purchase you will be able to download IISKeeper from your account area in the Software section on the Site. Read the Installation Guide, after that the installation process will take you a few minutes. --- To simplify installation IISKeeper has been made for integrated Microsoft Internet Information Services 3.0 (IIS 3.0). The setup wizard will automatically configure the required services and the required configuration in the default IIS 3.0 configuration, there will be no need to manually configure IIS. --- The distribution package includes a sample web site ready to use, you will be able to test the ISAPI protection before purchasing. After purchase you can have access to a free test version of the software with the sample web site. The test version is identical to the distribution package except for the sample data. There are no restrictions in the test version. --- IISKeeper is an Internet Information Services (IIS) extension that allows you to protect any resource on your web server, whether it be a single file or a collection of files and folders. This extension does not require the creation of a Windows user or Active Directory user. After purchase you will be able to download IISKeeper from your account area in the Software section on the Site. Read the Installation Guide, after that the installation process will take you a few minutes. --- To simplify installation IISKeeper has been made for integrated Microsoft Internet Information Services 3.0 (IIS 3.0). The setup wizard will automatically configure the required services and the required configuration in the default IIS 3.0 configuration, there will be no need to manually configure IIS. --- The distribution package includes a sample web site ready to use, you will be able to test the ISAPI protection before purchasing. After purchase you can have access to a free test version of the software with the 09e8f5149f
