Developing products using a third-party application requires an AutoCAD Plugin Development Kit. For custom feature enhancements, a developer can use AutoCAD application programming interface (API) to access and control several features. For example, APIs are used to display user-defined blocks. ObjectARX is a large class library that is used to build applications for AutoCAD. While ObjectARX supports traditional programming languages, it is also used to create graphical applications using

scripting. ObjectARX consists of modules that perform tasks such as window and drawing management. AutoCAD contains a number of tools for application development including: Editor.lib VC++ Plug-in Assistant Windows Script AutoCAD may be used for application design and development. It has both Autodesk Exchange Apps and a full-fledged application development kit (ADK). The Autodesk Exchange Apps are applications that users can purchase to expand or supplement AutoCAD. An example of this is the Autodesk Architectural Desktop, which allows the user to model, animate and plan architectural

projects. The ADK allows developers to create custom AutoCAD plugins (add-ons) for the AutoCAD system. AutoCAD has a number of frameworks that are intended to simplify development using scripting languages. These include, but are not limited to: WindowServer.net (ASMX and WSDL) ASMX Server (VC++ Plug-in Assistant) RESTful API GUIScripting.net (VBScript and VB) Python JScript Javascript (AutoCAD extension) JSON JScript support in AutoCAD was enhanced with additional support for Javascript by way of the.NET Framework. Visual JScript is the Scripting.NET implementation of JScript, an extension to the Microsoft's JScript

language. Microsoft.JScript is the library that implements JScript. Microsoft.JScript.V8 is the "namespace library for the Microsoft.JScript.V8.Runtime assembly. This is used when scripting with JScript, JavaScript and other languages such as VBScript that use the.NET Framework 3.0 or later." Programming environments AutoCAD supports a number of programming languages including LISP, Visual LISP, C, C++, C#, and others. LISP AutoLISP is an implementation of LISP in AutoCAD, ca3bfb1094
