PuTTY, aka the OpenSSH SSH client, comes with a great feature called SSH Key Manager. All you need to do is add a public and a private key, either generated by PuTTY itself or downloaded from a website, then drag your newly generated public key onto the SSH window. It will take PuTTY to generate a new public/private key pair if necessary and you can then use it with any SSH server. You can make this step more convenient if you create a pscp.ini file first. For more information about PuTTY's SSH Key Manager, click here: Enjoy! --- -- If you want to translate PuTTY into your language, visit the official portal: The purpose of this video is to show you how to create your own SSH Public/Private Key Pair with PuTTY (OpenSSH) SSH Key Manager, show you how to add new keys using the Manager, and how to generate and use a Host Key for SSH Authentication.
