New Referee Assistant The new Referee Assistant modifies the in-game gameplay based on human refereeing behaviour. Referees have different tendencies and styles, and the Referee Assistant uses real-time data to adjust the game's refereeing behaviour. This includes issuing warning cards, giving yellow cards and red cards, and claiming fouls. Real-time data for ref decisions is available on the in-game Player Status screen. Referees can even challenge for the ball with the new fourth official animation. FIFA 22 includes over 50 new animations, including the introduction of "Football Action," which showcases team plays and shots on goal for all 11 players in the game. The match day show, "FIFA 22 Highlights," showcases the most exciting goals and passes from the match. FIFA 22 also includes a "Highlights Mode," which allows users to access a selection of goals, key plays and best team moves to showcase in the game. **Enhanced Player Intelligence** The Enhanced Player Intelligence system uses new AI, scripting, and feedback data to increase real-life player behaviours on the pitch. Players adapt to match conditions using new player movements and reactions. For the first time, users will be able to experience a consistent ball-in-the-air animation at higher speeds. This is based on physics and feedback data from high-intensity football matches. **New 'Ultimate Team' Option** New 'Ultimate Team' mode lets players create their own team from a selection of over 200 real-life players. The team can then compete in a competitive match against others on the 'Match Training' menu, or play through curated scenarios created by EA Sports. The 'Ultimate Team' mode also allows users to create and share their own "FA Cup" competitions, where users can play their own mini-franchise in the FA Cup. **Enhanced Stadium Atmosphere** The new Virtual Stadium Atmosphere leverages real-life crowd data to deliver a uniquely authentic stadium experience at a glance. Spectators' fan reactions, crowd chants, and team-specific stadium atmosphere is created from real-life recordings of crowds. The virtual stadium also features new crowd and team animations in new dynamic cut scenes. The stadium's opening sequences and pitch walk-outs are also completely new. EA SPORTS DEMOS
