What's new:

Future Cave Once again our good city friends have provided us with information directly from the director of the museum. From the Director, Steve Hull: Adieu Gallimard! We planned the exhibit FOR RECORDING THE FUTURE to be one years long. I have to put a plug in for doing this cause I'm often told that we're too exploratory as an art museum and they don't like to take risks as

is evident in not letting us put out a poster. This is the first record we're putting out that we've actually created ourselves and it's for our own museum. 18 months has been a record that's mixed some true great songs and some from my stream of consciousness. I would say that the big difference between this record and some that I've been involved in is that I heard this record while it was forming and I held the record in my head and when I recorded the music it had a natural flow that I didn't get from my other recordings. I would say the addition of Scott Platt and upandbridgerecord would make this our most special release and he's one of the best players in Milwaukee!! I will not have his participation in any future releases so don't go looking for him on this record. This is a wonderful introduction into the larger life of the band. There are some real hidden gems among the songs. This is more of a pay it forward type release with the songs I selected being a learning of the songs. No matter how many times I hear these songs it's always surprised me. **YOU WANT MUSIC? WE'LL MAKE YOU SOME** At this point we are compiling a list of the best or most requested songs. Using the Internet we will release a compilation of local Milwaukee music. Your music will be featured in a hometown showcase shown at Pacific Motion Media downtown and in selected local venues. If you are an artist with a cd available or a radio show or a club or other show where you would like a **FIVE MINUTE** plug. That's it! Our webmaster will even contact you. It will be a time capsule of our town. It will be available only to customers of Pacific Motion Media and will be opened in a five year check back. So far they have what they need to do it. I expect things to really start getting interesting later this year. We are having a discussion with most of the stations and wanting a few more. Spring/Summer of 08 we expect
