I have already downloaded it, now I want to play it on my Android TV. My

---

Android TV version is 4.3. I have installed the app using the scan code. Here is my issue: the downloaded version of the playlists I have downloaded doesn't contain the songs from my downloaded playlist. It's displaying a blank screen. Is there any way I can play my downloaded playlist on my Android TV? PS: Sorry for my bad English. A: Actually you can use the Google Play Music ID in order to play your downloaded playlist. (The Play Music ID is a unique identifier for a song, that you can use to access it from the Google Play Music app on the Android mobile devices.) On your Android TV or Android device (you can view this step later), search for a song in the Play Music app on Android using your Play Music ID: On Android TV, the search result can be opened in the Play Music app or by clicking the Music icon on the left panel. On Android, the song can be played directly. I have tried it for the song "I-Ich habe mich verliebt" by the band "Die Toten Hosen". (I'm just using the file name in the example: "2L-YIHA5OVEKAK1V3XRBB".) You can do the same for the other tracks of your playlist. Troubleshooting: It seems that there are some problems when you have a downloaded playlist from the (Sony's) Music Pass. So first try to download the playlist from the Play Music App on an Android mobile device. If that doesn't work, delete your playlist on your computer, delete the downloaded playlist on your Android mobile device, and install it again. If that doesn't work, try it in two different browsers. I had to do it and it worked
