What's New In ImTOO Media Toolkit Ultimate?

===== ImTOO Media Toolkit Ultimate is a software pack that consists of five separate applications designed for media processing - Video Converter Ultimate, DVD Ripper Ultimate, DVD Copy Express, DVD Creator and Audio Maker. All programs come with user-friendly interfaces in which you can import media files by using either the file browser, treeview or "drag and drop" method. Batch processing is allowed. In the list you can read various information on each media file, including name, duration, output profile and size, along with status. Once you establish the output destination and file type, you can start the conversion job. But you can also configure audio and video settings when it comes to the quality, size, frame rate, aspect ratio, sample frequency rate, channel mode, volume, encode mode and others. Additionally, you can preview clips in a small, built-in media player and take snapshots, split clips by time or size, customize the CPU core number in use, set post-task actions (e.g. exit program, turn off computer), enable the software to run in the background in low priority mode, use a bit rate calculator, create a new output profile, edit metadata, add lyrics, and others. The media processing applications require a pretty high amount of system resources, support multiple skins and languages for the interface, have a good response time, quickly finish a task and manage to preserve a good image and sound quality after conversion. No errors have occurred during our testing and the tools didn't freeze or crash. There are also brief step-by-step guides that you can look into. We highly recommend ImTOO Media Toolkit Ultimate to all users.
