I started with a regular cardboard and then glued on some decorative pieces. He introduced a post to share some of the awesome destinations or paths you could create within the game.Â .Q: How to limit an inode via a file from a bash script I am making a bash script which will change a files's permissions to give the owner/group read/write/execute access to all subdirectories below a specified directory. Basically, you start at / and work your way up the tree. The problem is that I need the first entry of an inode to be 755 (like chmod), so I'm not sure how to limit the permissions to the first entry in the directory. I've
