Q: How to resolve "External library unresolved to path" error? I'm trying to use a library in an Android Studio (Mac OS 10.15.3) project. FileNotFoundException: Could not find com.google.samples.apps.guestgrabber:guest-grabber:1.0.1. The

library can't be installed on my Mac, I get a similar error message. How can I resolve this problem? A: Make sure you have installed Google App Engine SDK. In Android Studio go to Gradle tab and make sure sources libraries are configured to include the Google App Engine SDK directory: Q: Is a ban against "threats to work of students" (only when such work threatens their education) infringing upon freedom of speech? The following opinion piece was published in the Frankfurter Allgemeine Zeitung (FAZ). The point of contention in question has to do with the first sentence of the

Freedom of speech is protected to the extent that it is not harmful to others, or at least does not cause serious harm. Freedom of speech does not give anyone the right to make specific public statements that are forbidden by law (in Germany, such speech would require a permit). So this sentence is correct and free speech is violated if someone is arrested for hate speech. However, that does not mean that a ban against

"threats to the education of students" is justified by the Constitution. There are four problems with that: Threats to the education of students are generally not limited to speech. People sometimes resort to physical aggression against a teacher when they are not satisfied with the quality of their education. So whether your threat has any connection with your right to education is
