Is it possible to place the snare pad on two different connections (for example the middle + highspeed) and if so, how? A: You can put a QFN0 0402 pad on each of the 3 signal leads of the connector. It will hold it at right angles to the QFP0 0603 pads. It will help, but the snare pad is good and shouldn't be moved to avoid flexing. Q: How to use jquery autocomplete in android?
