In a brief message on Twitter, Mundelein District 3826 school board Superintendent Greg Stranieri has announced that the local school system has reaffirmed its participation in the Step Up program. The Step Up program is a federally funded program that provides extra education, health and parenting services to students with identified needs. The program is the result of the passage and implementation of the Reach Higher program. The arrangement with the school district will give MSHSL the reins in identifying students with the greatest needs and helping them develop the skills and resume preparation necessary to move on to postsecondary training. The school district will enroll at least 100 students in the year-long experience and continue to work with MSHSL and its associated partnerships to help identify students who are particularly interested in jobs related to engineering and technology. "Step Up embodies the ability of students and parents from our District to work together to help their children be successful in high school and beyond," Stranieri said in a prepared statement. $b e p (- 8) . Oculus Rift/Vive Virtual Reality Virtual Reality (VR) is the next stage in video game graphics. Now, virtual reality gaming is possible on PC and has been for some time. Fantasy Grounds, like all things connected with video gaming, is slowly adapting to the new requirements and opportunities of VR gaming. We are pleased to announce that the FG Meanders RPG is compatible with the Oculus Rift and Vive. You can get both VR headsets at a very reasonable price from the Oculus and Vive websites. The standalone Vive and Rift are easily affordable, and to do it right, will require a game that will both amaze and offer new opportunities to the user. As video gaming enters VR, this is where FG Meanders makes its move. In the world of VR, there are basically 3 places to have an immersive encounter with the player - in the world, in another dimension or not at all. Through the Oculus headset, the player will simply get a head mounted screen, with no surroundings as there are in conventional video gaming. The player can simply look around, see everything, hear everything and feel everything. On the other hand, the Vive is a bit different in that it creates a completely virtual world that allows the player to move around, interact with the objects and people around them and get a first person view. This is all brought to life in the FG Meanders RPG with interactive, moving objects, NPC characters, modular furniture, even new rules for combat and non-combat encounters. The FG Meanders RPG will change the way you think about video gaming - and change your RPG gaming, forever! To start playing with a VR experience, start at the Meanders Map Support page. This is the place to start the process of integrating VR into your existing Meanders Map Campaign. Gear VR We have just introduced Gear VR, a cheap VR headset. You can buy a Gear VR in the Oculus store for around \$80, which is a relatively inexpensive investment to try out VR. The Gear VR is aimed at Gear and Android users, as well as Windows and Mac users who may not be familiar with the process of getting things setup. Please see the Gear VR guide to set up your Oculus or Google Cardboard VR headset. To get started with Gear VR, you need to download the free Oculus Home app, then download the Gear VR app. Once everything is downloaded and installed, you will be able to load your Gear
