What's New In AutoCAD?

Get the new Audio markup assistant in Windows 10, which works much like QuickMark, the classic drawing markup assistant. (video: 15:43 min.) Or, use the drawing markup assistant as part of the new Markup Import feature. The feature automatically imports the data and layout of a paper or PDF into a new drawing. (video: 1:23 min.) New drawing templates: Prebuilt templates and new templates for custom workflows that are specific to your needs. Make your custom templates available as soon as you create them. Use the new "Open Template" command. Then, you can send these custom templates to any team member. (video: 14:14 min.) Or, create a single template with commands and other editing tools grouped together, so that you can apply them to any drawing. And, get started with the new QuickDock feature, which lets you import icons, commands, and drawings into the appropriate group on your dashboard. (video: 12:47 min.) Or, create a new set of command panels, which can be accessed quickly by a selection of keyboard shortcuts. (video: 1:30 min.) Or, create a set of new panels with custom properties to display information from your drawings or from other applications. Better drawing controls: The new Ribbon provides quick access to everything you need in your drawings. The Ribbon toolbar makes it easier to create a selection, zoom in and out, or navigate the drawing. The new toolbar for drafting-related commands makes them easier to access. For example, drag to place a point or a line. (video: 1:53 min.) The new palette for drawing commands lets you easily add commands, add to an existing command, or undo last commands. (video: 11:40 min.) And, the new shape-based, measurement-based, and dimension-based commands make it easier to work with shapes. And, the new snap feature lets you make sure that your objects are automatically aligned on both screen and paper. (video: 11:44 min.) Or, align objects that need to be aligned on screen, to create a template for your next drawing.
