The new F-Secure BOOSTER is a multithreaded program that incorporates several strong time savers, but it's also a very versatile one. It has a streamlined, modern and user-friendly interface that allows you to choose which application you want to work with and each option is accompanied by a brief

description, so the program isn't overwhelming. The program allows you to improve performance by cleaning up the system, optimizing the Windows registry, cleaning the computer's temporary files, cleaning programs and data, as well as deleting unnecessary files and performing quick updates of programs, drivers and the

Windows system. You can perform all of the above tasks with a single mouse click. F-Secure BOOSTER can scan for and remove any files that were opened but never used, which will speed up the loading of programs and improve system performance, as well as automatically update programs or drivers that are due for an upgrade. The utility

can be used to delete temporary files, optimize the program registry, remove unused internet browser and temporary files, clear browsing history, boost startup speed and update programs or drivers. **F-Secure BOOSTER** provides a number of handy tools, the most important of which is the 1-click optimization feature, which allows you to delete

temporary files, clean browsing history, clear browsing history, optimize the Windows registry, optimize programs and data, fix error problems and clean programs.

designed to clean up
your PC, improve its
performance and make
sure it is always up-to-

date. The utility is very easy to use, and it features a streamlined, modern interface. F-Secure BOOSTER makes it easy to gain disk space, and it is particularly useful for users who tend to accumulate large amounts of files and programs on their system, creating space problems. The software scans your PC and lists the individual files and folders, as well as the

amount of space occupied. As a result, you will get a clear view of how much space you have, and what files and folders take up the most space. You can then delete unwanted files and folders, as well as free up space by uninstalling programs or deleting the unused data. You can also delete everything from the System (This PC) folder, which will

ensure your own files are never deleted. F-Secure BOOSTER scans for and automatically uninstalls apps that are installed on your PC, and it will let you know when a program has an update available. The software also lets you disable services, which is useful if you are tired of having a steady stream of pop-up windows in your system tray. Moreover, it will make sure your

Internet connection is up-to-date, as well as optimize your power plan. F-Secure BOOSTER also features a Startup Manager that will identify programs and services that start automatically each time you boot your system, and it can disable them if they are no longer needed. Furthermore, the program scans for any overdue driver updates and will help you

recover deleted files and folders. F-Secure BOOSTER is a free utility that you can download and use to optimize your PC. It can help you to gain disk space, boost your PC's speed and make sure it is always up-to-date. Review F-Secure Booster v7.1.0737 [Download]
