Now releasing' the first of a trilogy of titles in the Other Warfare universe. THE REIGN: The Hand of Thorns - The Insatiable Oh dear, a draft. As many of you know, I have been working on a KENQUEST game, or at least, that is what I thought I was doing! I have spent the last year writing (and rewriting) a science fiction mega-adventure game, which I will be releasing through www.kenquest.com to a small audience and getting some feedback and also to make it an RPG! This first part of the game is called 'The Reign' and the quote from the first draft so far is as follows: "TRANCING", "So he whispers in the Ear of the Siren", "The Emperor", "It is the hand of Thorns", "The Queen has squealed", "She howls into the flesh of men", "She is the hand of Thorns! A Siren whose voice beguiles The Empire to do its bidding, and thrusts The Untouchables on the young and strong", "As the Emperor's spoilt child, she is the hand of thorns that tortures and plucks at the skin of all humanity as The Empire her... the greatest and most pitiful and most beautiful of all of her children. She is the Hand of Thorns!" The book is for the most part set in an alternative Roman Empire (Zweithin/Zeithingen), where the human race is split into a few great Empires, ruled by demigods, interlaced by war and a balancing between these Empires, in which none is more powerful than another, and each are kept in a political balance through bribery, power plays and diplomacy. It is a time when the hand of Thorns has been sweeping across the world and turning people against each other, and every Empire seeks a way to either stop the hand from turning on itself, or to kill it and use it for their own ends. This book covers the rise of a benevolent Emperor, a power hungry political rival and a country that believes that 'death is the only way'. I decided that it would be best to run a series of short one-shot adventure-RPGs, or mini-Campaigns, as this is the first book. To keep me on track (haha), here is the list of what I

### About the game - An RPG Maker 2000 game by Nakaya (SML)

Makers is revolutionary game design tool developed by Chiyoda in 2002. It is, as I see, an assembly kit for all capabilities of advanced game designs. And online game development tutorials and books are available for designers. However, conventional thinking is weak in design plans. There are several points in the game, such as interaction between characters, time differences, and many other new concepts.
