The first release of AutoCAD was for the DEC PDP-11/70 computer family, which was introduced in January 1983. The most recent version, 2016, was released in April 2016. The software is available for PCs running Windows, Mac OS X, Linux, iOS, Android, and web apps, as well as embedded systems, such as the Apple Watch, iPad, iPhone, and iPod Touch. AutoCAD is a registered trademark of Autodesk. Although AutoCAD is a Windows-only application at this time, it is possible to use a Raspberry Pi to run a version of AutoCAD on Linux. AutoCAD is a vast application, so this tutorial does not cover every function. Instead, it is a general guide to getting AutoCAD set up on a Raspberry Pi for use as a CAD system. To get started, you'll need a working version of the Raspberry Pi OS. You can also download a Raspberry Pi OS image from the Raspberry Pi Foundation. Before you begin, be sure to check the specifications of your computer system. See the Required Hardware section in the How to use AutoCAD on Raspberry Pi tutorial on this page. The most common Linux installation on the Raspberry Pi is called Raspbian, but the official image for AutoCAD only runs on Ubuntu. To get AutoCAD running on a Raspberry Pi with Raspbian, you'll need to follow a guide called "Running AutoCAD on Raspberry Pi in Raspbian." If you prefer to use Ubuntu, you can find instructions for running AutoCAD on Ubuntu on the Raspberry Pi foundation's website. Before you start Create a backup copy of the Raspberry Pi's SD card using the Raspberry Pi OS or an external hard drive. If the SD card is lost or damaged, you can restore the backup version to the card and the Pi will boot normally. If you use Windows, make sure to use a microSD card that has a minimum capacity of 8 GB. The Raspberry Pi's OS and application files require about 6.5 GB of storage space. You can buy a cheap 16 GB microSD card, and that will be enough. If you're planning to use the Raspberry Pi as a CAD system, use one of the recent versions of AutoCAD rather than an older version. Check that you have sufficient hard drive space to run AutoCAD. The Raspberry Pi OS uses about 400 MB of hard disk space, so

The VectorWorks and MicroStation AutoLISP is based on Microsoft Visual LISP. VectorWorks, MicroStation, and AutoCAD also support a functional object programming language called VBPX. AutoCAD's Visual LISP has been integrated into AutoCAD LT, resulting in AutoCAD LT LISP.
